MANY REMARKABLE OIL PHENOMENA

Greatest Exhibits Are in Russia—Mexico Gusher Disappears.

In parts of California considerable deposits of oil residue, "brea" or asphalt, says Mining Science, testify to the escape of great volumes of oil from the earth, but it is in Russia, Burma and the east and West Indies that the greatest exhibits of natural phenomena may be seen. Around the Baku fields of Russia, fields of asphalt are to be seen, and the constant escape of the heavy fluid may be watched in many localities. Where no moist clay covers the bed, great outbursts of gas, sometimes accompanied by oil, occur, and numerous holes sufficiently large to admit the body of a man are opened. In the West Indies for miles in the tropical jungles along the crests of anti-clines may be observed both heavy oil and gas steadily issuing from the earth, forming cones of asphalt mixed with earthy matter.

Inflammable Gases Issue.
Exceptional activity is displayed during earthquakes in such localities. In an earthquake in the Caucasus in 1902 inflammable gases emerged from fissures in the earth, and becoming ignited, greatly added to the terror of the situation. In the Arakan island on the coast of Burma, the mud volcanoes develop great activity at periods of earthquakes. Similar eruptions occur beneath the sea, where inclined oil strata are submerged. In the Caspian sea great volumes of escaping gas agitate the water sufficiently to capsize small boats. Off the coasts of Borneo, Burma and in the Caspian, sufficient argillaceous matter has been ejected from the bottom of the sea to form temporary islands.

The Baku Field Discovery.
Occasionally gas alone is expelled at a pressure which defies all measures to control it, as in Borneo, where millions of cubic feet were discharged daily for a long period. The most wonderful discharges of oil and gas were in the early days of the Baku oil field; one well in 1898 produced 117,000 barrels daily, while thousands of wells in the United States were collectively yielding only 150,000 barrels. Oil was ejected with such impetuosity and accompanied by so much sand that steel blocks 12 inches thick placed over the mouth of the well to deflect its flow

EL PASO MINE HAS RICH ORE PROPERTY

Felix Kahn Has Also Organized French Company for Durango Property.

Felix Kahn, of El Paso, president of the Corralito Mining & Milling company, operating mines in El Oro district, state of Durango, and also owner of the Monte Cristo gold mine in the same district, has returned from the mines, having made a shipment of high grade gold ore to the American Smelting and Refining company, at Peralta, and also some bullion, which was sent to the mint at San Francisco by express. The properties of the Corralito consist of the Santa Elena, San Juan, La Gloria, and Reina de Oro, all located on one vein. The vein runs northeast and southwest, consisting of quartz and mica schist, and is from one to four meters in width. The values are from five grams up to as high as seven kilos gold per ton, with very little silver. The gold is in a fine state above the water level.

Deepest Shaft Only 100 Feet.
There are about 500 feet of development work in tunnels and shafts, the deepest shaft being 100 feet. There is a 10-stamp mill on the property, first class modern mill in every shape. At present it is idle on account of lack of water. The company is composed of El Paso, New York and Michigan people. N. C. Thompson, of El Paso, is general manager.

French Company Interested.
Mr. Kahn has organized a company in France which has taken over the Monte Cristo gold mine which adjoins the Corralito group, with 1000 shares of stock at par value of \$100 a share. This property is being actively operated and developed. The mine covers a mountain called the Barras Prietas, formed of brecciated material, through which run veins from north to south and cross veins from east to west. While the mountain is exceedingly high, yet water has been struck at six meters depth. Arrangements are being made to install a 100-ton mill and cyanide plant. There are over 400 feet of development, all in ore. The shipping ore runs 100 grams and up of gold per ton, and all ore of less value is being piled on the dump for the mill.

Railroad Anticipated.
It is rumored that a railroad will be built from Desobrida to Corralito, and Mr. Kahn has already made a contract to furnish the road with at least two carloads of ore a day. The railroad will open, says Mr. Kahn, the greatest gold district in the Republic of Mexico. Our neighbors are the Irida Gold Mines company, the Godalupa Gold Mine company, and also the Luster Mining company, under the management of Capt. R. W. Bissell. He has over 1,000,000 tons of ore in sight, and is preparing to build a railroad to the smelter in order to haul coke and coal in.

N. C. Thompson has also opened a new gold mine, showing good values, called the San Pedro, adjoining the Monte Cristo, and has done 700 feet of development.

N. C. Thompson has also opened a new gold mine, showing good values, called the San Pedro, adjoining the Monte Cristo, and has done 700 feet of development.

In El Tremblor showing five ounces gold and 500 ounces silver. Carr and his associates have drifted 55 feet on the ledge, which shows no diminution of values so far.

WILL DEVELOP QUIJOTA PLACERS WEST OF TUCSON.

The Quijota placers, 60 miles west of Tucson, have been known for years to be rich, but like those of Altar, in Sonora, the gold was included in a formation which turned into cement in water. There is said to be six to eight thousand acres of placers, ground running in values from \$2 to \$10 gold per cubic yard. Judge Day of Tucson has been operating there and during the past five years has been panning around the grass tracks taking out \$200 and upward a year. One year he made \$20,000, and last year he panned out \$5000. The claim owners are going to put in the Quenner machines and claim that the Quijota placers will beat the record of the Altar placers.

POSSESSION AND WORK MUST BE DONE TO HOLD OIL LAND.

Where made under the oil claim, the boundaries marked but no discovery was made, and a cabin constructed but was unoccupied, but no drilling or actual development work prosecuted the land was held under the oil claim.

More posting of a notice and marking boundaries on an oil claim will not exclude others from a peaceful entry where the first locator had made no discovery and had no retained possession and prosecuted the work. Failure of the locator to discover oil and a failure to prosecute the work, was held fatal to the validity of the locator's claim under the oil placer act. New England Oil vs. Coudan, 96 Pacific Reporter, 180.

TEXAS CAPITALISTS HAVE HASOTIPACIL INTERESTS

The Vick Mining and Milling company of San Antonio, Texas, is awaiting the transmission of power to the Hasotipacil district, Jalisco, Mex. for the installation of machinery. Good progress is being made in road drilling and development up to date has opened up 45,000 tons of milling ore. A concentrating and cyanide plant will be built. A. J. Vicks, of San Antonio, Texas, is main owner.

DOHENY COMPANY SUPPLIES NATIONAL RAILWAYS WITH OIL

The National Railways of Mexico are now using 6000 barrels of fuel oil daily from the Ebanio fields, which is all that can be obtained, and principally from the Doheny company, whose property adjoins the oil field of the Pearson's, but is in no way connected with them. The Pearson's pipe line runs to the coast of Tuxpan, while the new pipe line of the Doheny company will run in a northerly direction to Tampico.

GENERAL OIL NOTES.

Oklahoma Report.
L. L. Hutchison, assistant director of the Oklahoma survey, has just issued a special state report on the asphalt, oil and gas deposits of Oklahoma, which is accompanied with a geological map of the asphalt-bearing district. It shows the exact location of nearly 100 known deposits. The various theories of origin and accumulation of petroleum are discussed.

California Greatest Producer.

California, according to Mining Scientific Press, now stands first among the states in production of petroleum, which is its most valuable mineral product, gold now ranking second. In 1909 California produced between 50,000,000 and 60,000,000 barrels of oil, valued at about \$30,000,000. A report on the McKittrick-Sunset oil region, in western Kern and eastern San Luis Obispo counties, prepared by Ralph Arnold and H. R. Johnson, has just been published by the United States geological survey. The region covered embraces about 1800 square miles.

Organizes Storage Company.

President S. W. Morehead of the Independent Oil Producers Transportation company is organizing a company for the formation of a large storage company to take care of the surplus oil of the California fields. Storage tanks having a total capacity of 6,000,000 barrels, at present empty, are being created, a small rate being charged producers for its service.

BAND CONCERT AT FORT BLISS FRIDAY

The last of this week's band concert at Fort Bliss will be given Friday night from 8 to 9 o'clock, and an invitation is extended to the general public to attend. Six selections will be given under the direction of conductor Majewski, as follows:
1. Twisted Nipples.....Williams
2. Overture, Orpheus.....Offenbach
3. Hearts and Flowers.....Tobani
4. Selection, Robinhood.....DeKoven
5. Cornet duet, The Virtuoso.....Hersog (Sergeant, Galesburg and Corp. Schiller)
6. March, Company B.....Majewski

AMUSEMENTS.

PARK OPENS SATURDAY NIGHT.

Washington Park opens for the season Saturday night, and there will be plenty of entertainment every night during the summer, if the pretentious plans for the opening are continued. The band will play each evening, the theater will be open with up-to-date vaudeville, and all the concessions—bowling, natatorium, miniature railway, bowling alleys, figure 8, etc.—will be open. The management announces the following program for the park theater for Saturday night and the first half of next week:
Devoy and Stevens, in their greatest comedy success, "The Bootblack's Quarrel."
Hear Miss Rose Black, "The Girl of the Year."

HAPPY RESULTS

Have Made Many El Paso Residents Enthusiastic.
No wonder scores of El Paso citizens grow enthusiastic. It is enough to make anyone happy to find relief after years of suffering. Public statements like the following are but truthful representations of the daily work done in El Paso by Doan's Kidney Pills.
Mrs. Blanche Cleaver, 1223 E. Overland street, El Paso, Texas, says: "For eight years I was subject to attacks of kidney trouble. If I took cold, it invariably settled in my kidneys and caused a dull ache in my back and right hip. There was also a soreness across my loins and I had chills. The kidney secretions were scanty and distressing in passage and caused me much annoyance. About a year ago my complaint became worse. Doan's Kidney Pills were finally recommended to me and procuring a box at Kelly & Pollard's drug store, I began their use. They strengthened my kidneys and proved of benefit in every way."
For sale by all dealers. Price 50 cents. Foster-McBure Co., Buffalo, New York, sole agents for the United States.
Remember the name—Doan's—and take no other.

Saturday Specials In Articles You Will Need

Meat & Grocery Departments Offer Special Values

It appears that our Grocery and Meat departments are going to be active competitors Saturday as each has given especially good values in the best of their departments. The careful shoppers cannot afford to overlook Nations' Market Saturday where the prices are exceedingly low, and quality the best. If impossible for you to visit the market Saturday your phone order will receive prompt and careful attention.

Grocery Department Specials

"Lyndon" brand Lemon Cling Peaches, 3 lb. cans. Regular price 35c. Special price.....25c
"Hills Bros." Baking Powder, 1 lb. cans 30c; 1-2 lb. cans.....20c
Fresh Peas, 3 lbs.....25c

Meat Department Specials

Fresh Pork Shoulder Roast, per lb.....17½c
Nations' Rolled Roast from fed cattle, per lb.....15c
Rib Stew or Brisket from fed cattle, 3 lbs.....25c

Include An Order for Blue Valley Butter in Your Next Order

Exclusive Agents for "Casino" Flour and Hills Bros. Teas

The Golden West, singing beautiful illustrated songs. Interpreted, "When the Parson Said the Words that Made Us One," and "My Dream of the U. S. A."

The four Solars, the dancing wonders, introducing "Baby Solar, the youngest dancer in the world."
Ellis and Ferrar, in their laugh producing farce, "The Clown's Dream of the Mechanical Doll."
Good motion pictures chase the blues away, with a laugh every minute.

A Happy Father
is soon turned to a sad one if he has to walk the floor every night with a crying baby. Mother's Baby Elixir will make the child well—soothe its nerves, induce healthy, normal slumber. Best for disordered bowels and sour stomach—all teething babies need it. Pleasant to take, sure, and safe, contains no harmful drugs.
Price 25 and 50 cents per bottle. Sold by all druggists.

DRINK MILK---DRINK PLENTY OF IT---DRINK EL PASO PURE--MILK

There is more food value in one quart of El Paso Pure Milk than there is in one pound of the choicest porterhouse steak. El Paso Pure Milk is pure milk. It comes from inspected, contented cows, and is treated by the most scientific method. Delivered to you in sterilized air-tight bottles.

OLD SPANISH SILVER MINE CHANGES TO COPPER
The new pipe line from El Paso creek to the Antiqua mine, in the Mochizums district, Son. Mex., taken over in December by Henry C. Carr and the Steiners of New York, has been completed, and the camp now has a supply of water for all purposes. The Antiqua was formerly under Spanish control, a high grade silver mine, but development is now in high grade copper, of which about 1,000,000 tons have been blocked out.

The owners have continued to develop rich values in El Tremblor mine, purchased from R. L. Van Dusen and Tim Lamberton, 60 miles farther south than the Antiqua, which is located north of Nacozari. A month ago a vein was cut

When you're retired of "Tom, Dick and Harry" brands and you're sure that a nickel can't buy your quality, try a **Henry George 5c Cigar** and learn that it isn't price but blend that counts—that expense doesn't produce flavor, but the right combination of wrapper and filler. Ripe as well as right tobacco, seasoned until all the harshness is aged out, and with workmanship to match. The Henry George makes good because it's made well—it's a mild, mellow, soothing smoke. In every case in town, and ahead in every case.

The Clubhouse is banded—the Perfecto is not
